# HEALTHCARE CAREERS

Currently  
Available in  
MedPath

# A NOTE TO PARENTS

## | Exploration

### **Kids and Teens Need More Options**

Most kids and teens who say they want to work in healthcare can name two or three careers — and then run out of options. Not because their imaginations are limited, but because nobody has ever shown them the full map.

Healthcare isn't one career. It's dozens — from anesthesiologist to genetic counselor to medical illustrator to urologist — each requiring a different kind of mind and a different path to get there.

This list is a small taste of what MedPath does across four progressive levels: expose students to the real landscape of healthcare, taught with clinical accuracy and genuine respect.

**Note: This list was updated April 29, 2026.  
We are always adding more.**

# WHY THIS?

## | Exploration

### **Most kids & teens can only list 2-3 healthcare careers.**

You're going to be able to list a lot more and know a lot about them! The career snapshots and coloring pages in MedPath show you what different healthcare professionals do, where they work, and how they help others. Whatever your personality, abilities, or interests, there's a place for you in healthcare.

Let's explore what's possible.

### **Would you rather...**

Whether you work in healthcare or do something else entirely, would you rather do work that involves mostly thinking, mostly working with your hands, or mostly interacting with other people? Or would you prefer a combination of two or all three? Why?

**Note: This list was updated April 29, 2026.  
We are always adding more.**

# IN MEDPATH

## | Diagnose and Treat

Anesthesiologist

Cardiologist

Dermatologist

Emergency Medicine

Endocrinologist

Family Physician

Immunologist

General Surgeon

Rheumatologist

Nephrologist

Neurologist

Orthopedic Surgeon

Pathologist

Pulmonologist

Urologist

Cardiothoracic Surgeon

Gastroenterologist

Infectious Disease Specialist

## | Direct Patient Care

Athletic Trainer

Audiologist

Occupational Therapist

Physical Therapist

Respiratory Therapist

## | Science and Research

Geneticist

Medical Laboratory Scientist

Medical Illustrator

## | In the Community

Paramedic and EMT

Public Health Worker

## Why MedPath?

Most kids interested in healthcare can name 2-3 careers.

### **The problem starts early.**

By middle school, many students have already decided medicine isn't for them, even if they've never really learned what those careers are.

They see doctor, nurse, vet. They don't see genetic counselor, anesthesiologist, medical illustrator, urologist, respiratory therapist, or the dozens of other paths that might be a perfect fit.

## Early Support

### **For tech but not med?**

There are coding programs for third graders. Robotics teams for middle schoolers. A clear pipeline for kids who want to work in tech.

For kids who want to work in medicine, nothing like that has ever existed.

Until now.

## How MedPath Helps

### **That's why MedPath exists.**

The only program of its kind in the world, built by a physician, for students from late elementary through high school.

Four levels. Real clinical content. The full landscape of healthcare careers. Not fun facts. The actual foundation.

You can learn more at [docrobinschool.com/medpath](http://docrobinschool.com/medpath)

## How can we help you?

Please **contact us** if you have questions about whether MedPath is right for your child or need any help enrolling!

*Whether you're curious about MedPath or just want guidance, we're here to help!*

See you inside!

## Ready to Go Deeper?

I created MedPath for parents who want to give their child a real foundation in medicine — not a collection of fun facts, but the clinical thinking skills that actually determine who makes it through premed and who doesn't.

There is no other program like this in the world. MedPath spans four levels, covering anatomy, physiology, pathophysiology, and career exploration — built by a physician who spent decades watching what students needed and never found it already built for them.
