

LifePath: Anatomy for All

Advanced Exploration

DOCROBINSCHOOL.COM

From the Desk of **Dr. Robin Dickinson, MD**

COURSE SYLLABUS

A deep dive into human anatomy for middle & high school learners.

30 Video Lessons

10h 54m Total Video

Ages 17+

Physician-designed. Family-tested. No textbooks required.

ANATOMY ISN'T JUST FOR FUTURE DOCTORS

Whether your learner dreams of becoming a nurse, a novelist, or simply wants to understand their own body better, **LifePath** makes real medical science accessible and empowering.

Advanced Exploration picks up where Primary Studies leaves off — and where most science curricula stop entirely.

Middle and high school learners are ready to move beyond naming parts and start understanding **how systems work together, why the body makes the choices it does, and how that knowledge connects to health, medicine, and real life.**

Dr. Robin brings physician-level clarity to every lesson without losing the curiosity that makes learning stick.

| Who It's For

In this engaging visual course designed **for middle and high schoolers**, students take a deep dive into human anatomy through expertly guided lessons and vibrant coloring activities.

Taught by **Dr. Robin**, a physician and educator known for making medical science accessible, this course combines scientific accuracy with hands-on learning to build a strong foundation in anatomy.

With each lesson, learners explore how body systems work together, helping them connect their curiosity with real-world applications in health, medicine, and biology.

LEARNING OBJECTIVES

- ✓ Learners will identify and describe major organs, tissues, and systems in the human body.
- ✓ Learners will enhance their ability to visualize anatomical structures through labeled coloring and diagrammatic learning.
- ✓ Learners will be introduced to age-appropriate medical terminology and concepts.
- ✓ Learners will explore how body systems interrelate and contribute to overall health.

| The Dr. Robin Method

Every lesson follows the same proven structure: moving students from **watching** to **doing** to **understanding**.

1

Watch

Short, physician-led video lessons that make complex anatomy click.

2

Color

Use medically-accurate coloring pages to build a mental map of the body in anatomy.

3

Review

At the end, there's a quick review to help lock in the new information.

YOUR COURSE MATERIALS

Lesson Videos

30 physician-led video lessons covering every major body system.

Anatomy Coloring Pages

Medically-accurate diagrams for every lesson. Available as a PDF printable — or as Dr. Robin's printed coloring book on Amazon (included for MedPath annual plan students).

Course Content

Each lesson includes a brief instructional video, guided coloring activity, and quick review to reinforce key concepts.

LESSONS

#	Lesson	Length
1	Lungs in Situ	26:40 min
2	Alveoli and Bronchi	22:18 min
3	How We Make Speech	22:39 min
4	Heart Exterior	20:44 min
5	The Cardiac Cycle: Systole and Diastole	16:19 min
1.6	Heart Interior In Situ	19:34 min
7	Circulatory System	34:29 min
8	Kidneys and Bladder	13:03 min

#	Lesson	Length
9	Kidney and Nephron	29:19 min
10	Inside the Mouth	16:55 min
11	Digestive System	32:13 min
12	Small Intestine	18:03 min
13	Biliary Tree	27:21 min
14	Lymphatic System	24:54 min
15	Skin	21:44 min
16	Bones and Joints	28:51 min
17	Comparative Anatomy: Bones	20:43 min
18	Comparative Anatomy: Muscles	25:04 min
19	Axial Skeleton	15:34 min
20	Spine and Spinal Cord	17:16 min

#	Lesson	Length
21	Dermatomes	17:45 min
22	Nerve Cells	18:09 min
23	Autonomic Nervous System	23:32 min
24	Brain	22:48 min
25	Homunculus	13:20 min
26	Eye	18:38 min
27	Ear	19:01 min
28	Where Senses Go in the Brain	16:07 min
29	Systems of the Human Body	26:55 min
30	Human Cell	24:19 min
